- Cradle Systems

Water Storage Tank Cleaning

Contaminated water is the most common cause of illness to mankind. Around 50% of diseases caused to humans are water-borne with children below 5 years more susceptible. One of the most usual ways water getting contaminated is through water storage tanks - the cleaning of which is either neglected or inappropriate means like the services of a local plumber or sweeper are engaged.

Common reasons for contamination;

1. Over-storage -The water stagnating in the tank for 3-4 days before being filled, that causes water contamination.
2. Poor Flow - often tanks are set up incorrectly such that water only flows through one tank.
3. Deposits / Scale - build up of silt and scale over time can provide nutrients for bacteria to grow.
4. Tank Top Cover - if the Tank Top Cover fit incorrectly or is made of the wrong type of materials can allow organic matter into the Tank or themselves encourage bacterial growth. Or it allows falling, leaves, dead birds, lizards, other insects and animal droppings.

Al Khamis Cleaning Est. provides well trained and experienced Inspectors and Cleaners for sort out your Water Tank contamination problems.

High Pressure Jet/Steam Cleaning.

Al Khamis Cleaning Est. Provides HP Jet/ Steam Cleaning Machines for below applications:-

High Pressure Washing,

Building Cleaning,
